Education

University of Maryland, College Park

Aug 2023 – May 2027

A. James Clark School of Engineering: *BS in Computer Engineering*

- **GPA:** 3.53/4.00
- **Coursework:** Object Oriented Programming, Computer Systems, Organization of Programming Languages, Algorithms, Electric Circuits, Discrete Signals, Computer Organization, Signals Systems, Nanoelectronics
- **Activities:** Engineering Honors, Orientation ClarkLEADER, Society of Women in Engineering, Dean's List, 2025 Deloitte Case Competition Finalists

Experience

Lockheed Martin

Mount Laurel, NJ

Current Systems and Software Engineering Intern

June 2026 – Present

- Develop **Java Spring Boot** services for mission-critical defense applications and distributed systems.
- Build and maintain **ActiveMQ**, **Protocol Buffers**, and **Linux** development workflows.
- Collaborate in **Agile** teams and develop **CI/CD pipelines** for software integration and deployment.

Optimoz Inc.

Rockville, MD

Software Engineering Intern

June 2025 – Aug 2025

- Built a **React Native** voice-memo recorder with live waveform visualization and **AI** transcription into patient profiles; generated **LLM-powered SOAP** notes in under 10 seconds.
- Implemented **FHIR-compliant** storage for 100 patient records in a **Docker**-containerized backend with CI/CD pipelines, cutting build and deploy time by 60%.

Projects

TestuGo UI/UX Lead Vertically Integrated Project (VIP) @ UMD

Jan 2025 - Present

- Led sprint planning, task assignment, and cross-team coordination across all UI app features
- Developed 20+ **Kotlin/Compose** and **Swift** UI interfaces with event-driven navigation, state-based workflows, and cross-platform feature integration
- Implemented **ArcGIS** geofencing for 100+ scavenger hunt points and shipped app to the Apple and Play Store, growing past **Beta** stage

Weapon Watch App xFoundry Competition 2025

Aug 2024 - Sept 2025

- Developed a real-time weapon detection and alerting system using **Python**, machine learning, and **React Native** for K-12 school safety applications
- Implemented 15+ cross-platform UI components with **API**, **Firebase**, and cloud-function integrations supporting authentication, detection events, and live system updates
- Reached **finals** at the Nexplore 2040 Summit, placing **1st in sales pitch** and **3rd in business plan**

Over Terrain Vehicle Engineering Design @ UMD

Aug 2023 - Dec 2023

- Achieved 2/2 perfect evaluation runs, top 10 out of 80 teams, and a **Best Constructed Vehicle** nomination; developed **embedded C/C++ Arduino firmware** for motor control, a depth sensor, and a conductivity probe
- Designed mechanical and electrical subsystem components, including chassis, drivetrain, and sensor mounts, using **CAD models**, hand sketches, and **systems engineering lifecycle** design stages

Skills

Languages: Java, JavaScript, Python, C, C++, Assembly, MATLAB, Verilog, Arduino, Flutter, Typescript

Web/Mobile: React, Next.js, Expo Go, HTML, CSS, Tailwind, Kotlin, Swift, RESTful APIs

Tools/Frameworks: Firebase, Supabase (PostgreSQL), GitHub, GitLab, Jira, Docker, Android Studio, XCode, VS Code, Adobe Suite, Autodesk Fusion 360 CAD, Microsoft Office

Dev/Engineering: Agile development, CI/CD pipelines, Systems Lifecycle, Linux/Unix, Bash, Embedded Systems

Hobbies: Poker, Rubik's Cube, Volleyball, Pickleball, Graphic Design, Singing, NYT Games, SAT Tutoring
